CAREER FOCUS

As a highly skilled and result-driven software developer, my focus is always how to create high-quality, scalable, maintainable, predictable, and high-performance applications for my clients. I also strive for excellence and precision at all times, no matter the circumstance, to meet my clients' expectations, contribute the best of my ability to improve their organizational objectives, and enhance their products with state-of-the-art technologies.

WORK EXPERIENCE

Full-time employee   2020 - present
iTecGurus, Florida, U.S.A.
Software engineer: Working with other software developers on the team to develop new features and maintain applications for some of iTecGurus' clients.

Full-time employee   2017 - 2020
Andela Nigeria, Lagos, Nigeria
Software development: Worked collaboratively to build web and mobile applications for Andela in-house use and for their clients, mostly in United states.

Contract employee   2019 - 2019
Bittboard, Chicago, U.S.A.
Full-stack development: Worked with other developers to develop a platform for running a visual commerce business.

Contract employee   2018 – 2019
Attune Insurance, New York, U.S.A.
Full-stack development: One of the Andela clients that I was assigned to work with in New York. Worked on both frontend and backend of their projects to develop their payment system and implement some other features.

Full-time employee   2016 – 2017
Ekaruz Technology, Lagos, Nigeria.
Full-stack development: developed fully-fledged invoice management web app for them and collaborate with other team members to develop features for their clients.

Developer Intern   2014 – 2015
Software Development Unit, Ahmadu Bello University, Zaria.
Web application development / Office assistant: Worked mainly as intern with the senior developers on the team to maintain and develop features for the university website.
